Data Science

What is Data Science?

Data Science is the science of extracting useful insights from data using data science methodologies.

```
In [2]: print('hi ya\'ll')
```

```
hi ya'll
```

Data Types

- Strings: Written in quotation marks.
- Lists: contain lists of items in strings, bools, or numbers, and are mutable. Written between two brackets.
- Tuples: contain immutable items but they are iterable. They are often between two parentheses.
- Dictionaries: contain keys and values and written in curly
